PROJECTS

FlyFit

[Live Site](#) | [Details](#)

- Built a production fitness-platform for a Bahrain-based client, serving **300+ active users** with online package purchases, class scheduling, membership management, and booking.
- Integrated **2 payment gateways** (Credimax/Mastercard and BenefitPay) with ERPNext/Frappe as the backend source of truth, including server-side payment validation and 3D Secure authentication.
- Implemented a backend-for-frontend architecture with Next.js API routes to keep payment and ERP credentials off the client.

ShopSphere

[Live Site](#) | [Details](#)

- Built a multi-tenant SaaS e-commerce platform enabling merchants to run branded storefronts on custom subdomains, manage products/orders, and accept payments through Stripe and Paystack.
- Implemented subdomain-based tenant routing, role-based authentication, inventory tracking, analytics, and automated payouts using Next.js, TypeScript, PostgreSQL, and Prisma.
- Handled product media at scale with Cloudflare R2 storage and structured form validation via React Hook Form and Zod.

NovaCare

[Live Site](#) | [Details](#)

- Developed a hospital management system unifying doctors, pharmacists, laboratory teams, receptionists, and administrators around patients, appointments, admissions, prescriptions, and billing.
- Built a TypeScript/Next.js monorepo with a modular domain-driven backend, PostgreSQL, Prisma, JWT authentication, and a shared validation package across services.

EXPERIENCE

Freelance Software Developer

Jan. 2025 – Present

- Delivered production web applications for international clients, including a fitness-studio booking platform (FlyFit) for a Bahrain-based business and an e-commerce storefront (Moorafrika) for a fashion brand.
- Translated client requirements into scalable Next.js/TypeScript applications, integrating third-party payment gateways (Credimax, BenefitPay, Paystack), authentication, and cloud media storage.
- Designed backend APIs, database workflows, authentication, and third-party integrations, while handling deployment and production troubleshooting across client applications.
